

**PRODISPLAY®**

**FRONT PROJECTION WHITEBOARD**

Pro Display's Front Projection Whiteboard Screen is a specially formulated rigid, flat front projection screen providing high gain, excellent contrast and good colour reproduction in high ambient light conditions.

This unique screen technology offers superior performance to conventional screens, making it the ideal choice for all front projection applications. There is no need to turn down the lights; you will still achieve bright and vivid images. A special optical surface is cast on both sides to create a dual projection surface that can be used with two projectors to display two pieces of content simultaneously with 180° viewing angles on both sides.

This screen disperses light more evenly across the surface area which means it is the ideal choice for all short throw projectors. The optical screen coating also supports dry wipe markers, allowing the screen to double as a traditional smartboard style display.

## SPECIFICATIONS

- White matt rigid acrylic screen
- Peak Gain - 6
- Viewing Angle - 180°
- Thickness - 5mm
- Standard screen sizes from 32" - 134"

## BENEFITS

- Used with 2 projectors for dual images
- Supports 4K or HD rear projection
- Supports ultra-short throw projection
- Can be used with dry wipe markers
- Custom sizes & shapes available

## APPLICATIONS

- Dual sided projection screens
- Schools, universities & colleges
- Meeting rooms & boardrooms
- Interactive whiteboards
- Airports, bus & rail stations
