

**PRODISPLAY®**

**LED MIRROR VIDEO WALL**

Engage your customers like never before with our Mirrorvision LED Video Wall Displays. As a screen that also functions as a mirror, this incredible technology boasts a commercial grade LED display, offering unbeatable brightness in pixel pitches from 0.9 to 3.9mm.

This product is perfect for retail stores, airports, visitor attractions and nightlife venues, giving your space a real sense of class. These screens are shipped in a modular format allowing you the freedom to create LED Mirror Walls in any size. We offer a range of coatings to cater to optimum image quality or mirror effect.

Our Mirrorvision Video Wall Displays are also available as an Interactive Touch Screen, offering the ultimate display to engage your customers. We can also offer LCD Mirror Video Walls for smaller format applications that do not require the level of brightness achieved with an LED screen. Oversized mirrors are available on request.
