

**PRODISPLAY®**

**LED PERIMETER SYSTEM**

Pro Display's LED Perimeter systems offer an outdoor rated high brightness advertising solution designed for perimeter advertising and sporting displays. Our LED Perimeter Systems as standard have a 10mm pixel pitch ideal for pitchside displays with options for solutions that meet UEFA standard compliance and higher resolution models.

Our LED Perimeter Displays are IP65 rated, making them waterproof and suitable for outdoor use, built to withstand even harsh weather conditions. Shipped in a modular format, our LED Perimeter panels can be joined to create systems of any length and come with a control system & basic operating software.

Offering brightnesses of 5,500 to 6,000 nits, these modular LED screens work in even direct sunlight, making them a reliable choice for use in TV & broadcasting. We also offer indoor perimeter systems as well as a range of Indoor & Outdoor LED screens suitable for large format advertising display screens.
