

PRODISPLAY

Free-Standing Mirror TV

Mirrorvision® Free-Standing Mirror TVs combine a highly reflective optical mirror with a premium HD or 4K Smart TV, creating an elegant dual-purpose display solution for residential and commercial interiors. When switched off, the screen appears as a stylish full-length mirror; when switched on, the television image magically appears through the mirrored glass.

Available with a 43" TV, our Free-Standing Mirror TVs can be customised with a choice of decorative frames or sleek frameless polished edge designs to complement both contemporary and traditional interiors. We also offer bespoke oversized and shaped mirror solutions for customers seeking a truly unique statement display.

Manufactured using premium grade Mirrorvision® TV mirror glass, these displays offer the perfect balance of reflectivity and image clarity. Customers can select from a range of mirror finishes and reflective tints to suit their environment, whether prioritising superior picture quality or enhanced mirror reflectivity. Designed to integrate seamlessly into luxury homes, hotels, hospitality spaces and high-end commercial environments, our Free-Standing Mirror TVs provide a sophisticated way to maximise space while maintaining a clean and stylish interior aesthetic.
