

**PRODISPLAY**

Square LCD Advertising Screens

Our Square LCD Displays offer a specialised, non-glossy digital solution ideal for advertising and showcasing digital art.

Available in a range of unique aspect ratios and sizes from 22" up to 33", these high-definition panels cater for high-quality up-close viewing in retail environments and specialized gallery applications.

Available in both Android and Monitor versions, the Square LCD Series features an anti-glare screen specifically designed to eliminate reflections from nearby light sources.

The Android version comes integrated with a multimedia system, Wi-Fi connectivity, and an internal player powered by an ARM Quad-core processor to get your content running in no time. Depending on your installation requirements, these displays offer a VESA standard mount and include a wall bracket for simple set-up.

## SPECIFICATIONS

- **Screen Sizes:** 22" and 33"
- **Brightness Options:** 500 nits
- **Viewing Angle:** Ultra-wide 178°/178°
