

# PRODISPLAY®

## Stretched LCD Displays

Pro Display's Stretched / Shelf Edge LED Screens offer a robust, ultra-wide display solution designed specifically for high-traffic retail and commercial environments. These unique aspect ratios are engineered to fit where standard screens cannot, providing vibrant, high-brightness visuals that capture attention at the point of sale or within architectural features.

These displays offer a versatile alternative to traditional signage. Their slim profile and modular nature allow for seamless integration into shelving units, corridors, and transport hubs, offering wide viewing angles and exceptional clarity for close-range engagement.

Each screen is simple to set up, coming complete with the necessary control system and operating software. Designed for longevity and ease of use, these models provide a modern, dynamic edge to indoor digital advertising and information wayfinding.

### SPECIFICATIONS

- **Screen Sizes:** 29", 35", 47.1", 47.6", 88"
- **High Brightness:** Engineered for visibility in brightly lit indoor spaces
- **Ultra-Wide Aspect Ratios:** Ideal for panoramic content and retail headers
